

# TELESCOPIC LONG SLIDER KIT HANDROLLER

**ROLLSROLLER®**  
FLATBED APPLICATOR

## KEY FEATURES

- Ergonomic design
- Clean any flat surface
- Easy cleaning with paper sheets
- Extendable shaft included

## A PROFESSIONAL HAND-HELD ACCESSORY

Long reach cutting and cleaning tool that allows you to cut or clean different kind of medias across the length of a Flatbed Applicator or cutting table, without leaning over the table.

Stepless adjustable telescopic pole from 630mm/24,8in to 1 530mm/60in. in length. The cutting head allows to apply pulled or pushed cuts.

Perfect as a cutting extension. Composed of telescopic pole antistatic roller and slider cutter. The cutting head and the cleaning roller could

be attached to the pole by a very solid threaded steel connector and can easily be taken off.

An optional additional telescopic handle (part number 128-002) can be added to keep the cutting head and cleaning roller mounted simultaneously, improving efficiency by reducing tool changeovers.

For cleaning applications, cleaning pads (part number: 128-003) are required and sold separately.
